

## Common Challenges faced During ART

16-01-19 00:00:00

reports that they are given for short periods.

to Kibuli to seek ART care from there as he reports that HIV care at Bushenyi is not the best; long waiting hours; sometimes drugs may get

from Kibuli Police HC III; also has a new relationship and has not yet disclosed to her new plan partner.

distance from kibuli on his periodic scheduled visits.

from Kibuli; this is greatly a long distance (transport costs etc)  
challenge on the scheduled days.

ect the HIV virus; commended him on that.

nsports costs are high.

they may have complaints necessitating an M.O),hypertensive on oral anti hypertensive (Amlodipine; Losrtan; Cardiac ASA); recently been  
costs to be able continue with getting ART at kibuli.

ork despite even going to work with them.

re-fill in time as she is still getting ART treatment from Kibuli.

care from kibuli

s late

done in February. The wife too.

ere Negative. Advised to have a more recent HIV test done and give us feed back.

care from Mbale; has challenge of transportation to the health care center.

ness; nausea) and want to stop the ARVs; strongly advised her against taking any decision to this effect without first consulting with her pri

he nurse who just continues with the same treatment yet at times she may be having health inquiries for a medical officer to address.

ad her the Toll free line to call us back.

contact; at the time of calling the brother was in the field and thus could not collect the necessary information. Gave him the Toll free line to ca

e pharmacist.

ceased activity and prescribed tabs panadol 1 g three times day.

to continue with Niverapine syrup and taking her ARVs and to go back for HIV antigen testing when baby is 6 weeks.

er knew Mugisa Bernard and was from Kalungu.

ids was tested Positive for HIV and getting treatment from Maldmaid. C/o on and off burning sensation in the lips

ART care from Kibuli PTC.

200mg once daily one month and terbinafane cream for 2 weeks.

ed back later.

lled back later.

r.

he child had to go to Kabale with the mother & now the HIV care team of Kabale need ART records which were left at Naguru.

nged.

exist on the network.

out of service or disconnected.

out of service or disconnected.

on pain killers. Advised on increasing on water in take. Partner has not yet been tested ( not yet disclosed). He is ART naive only on septri

n B complex tablets as it is a side effect of treatment.

male police HC 3 are not correct and that they are handled well and that her last viral load test showed that virus was undetectable and was  
he was not called the names on our data capture forms and that he was not attending any ART clinic anywhere..

HIV test was Negative ( a few months back from date of call)
